### ORAL USAGE FOR ALL INTERNAL AILMENTS

#### **In Advance of Illness:**

As a powerful nutritional health tonic that provides vitality, energy and well-being - as well as a general preventive against colds, flu and a host of disease causing pathogens, it is recommended that anything between 50 ml - 300 ml be ingested daily in smaller doses spread throughout the day. When this is done regularly, Electro Colloidal Silver strengthens the immune system resulting in more energy, vitality, vigour, relaxation, faster healing and reduced bodily toxins. It also improves digestion.

Some people will find the maximum benefit from a lesser amount, while others will find they need more. The main thing is to interpret your body's response and work with Electro Colloidal Silver. When ingesting it, hold it in your mouth and swish it around your tongue for 20 seconds before swallowing. Because of the silver ions' microscopic size, they are absorbed into the bloodstream immediately!

#### **Chronic or Serious Conditions:**

A growing body of users are turning to electro colloidal silver to help treat a wide variety of chronic and "incurable" conditions. Many of these users feel that small amounts are not so effective, and sustain larger doses for extended periods of time, ingesting up to a litre of electro colloidal silver daily.

We thoroughly endorse this thinking as long as you can be sure you are taking electro colloidal silver that has been correctly produced!

For serious conditions it is recommended that you start off slowly (Refer: The Herxheimer Effect) at 2 x 25ml for the first day. Gradually (over the next three days) the dose can be increased to 4 x 25ml per day. Thereafter, one can build up to a daily intake of 500ml or more per day. This should be divided into smaller doses throughout the day.

### TOPICAL USAGE FOR ALL SKIN CONDITIONS

#### **Application:**

Spray directly onto the affected area and allow to dry.

Depending on the severity of the problem, one can do this ten or more times per day.

#### **Cuts, Wounds, Insect Or Animal Bites, Sores And Abrasions:**

Electro Colloidal Silver can be applied directly to cuts, wounds, sores and insect bites to eliminate surface infections. In the case of an open wound or cut, spray it immediately right into the damaged tissue. Following that, spray it regularly on the dressing or band-aid pad to shorten healing time and reduce scarring.

Unlike many other antiseptics, Electro Colloidal Silver does not sting or burn and assists the surrounding tissues to promote rapid healing.

#### **Sores, Boils, Ulcers, Lesions, Bed Sores, Warts, Moles Etc:**

In the case of an isolated area where a strip of gauze (held in place by a light bandage) or band aid can be applied, saturate the gauze or band aid pad with ECS and apply. This can be applied overnight before going to bed for good results. Keep the gauze or pad moist with Electro Colloidal Silver for as long as necessary. Older folk who are bedridden or disabled folk can especially benefit from Electro Colloidal Silver.

**Burns:**

You'll be amazed at how quickly Electro Colloidal silver works on burns! Spray immediately on burns to prevent infections, lower pain and promote faster healing with little or no scarring. (**Note:** A silver based dressing is now the standard medication for the treatment of severe burns in all major hospital burn centres throughout the world).

**Eczema And Psoriasis:**

These are common skin disorders but are very often influenced by internal conditions like a malfunctioning digestive system. Besides applying CS topically as often as possible, the diet should be adjusted to avoid animal protein, eggs, white refined sugar etc. and to include plenty of raw foods, especially potassium rich foods like cabbage, beetroot, carrots and bananas. Ginger tea (a few slices of raw ginger soaked in boiling water for 10 minutes) is also excellent for the digestive system. It is also essential that electro colloidal silver be taken orally. Dosage should be 50 ml. four times per day taken with a large glass of water so that it can reach the digestive system.

**Athlete's Foot & Nail Fungus:**

Spray on feet and between toes as often as possible (min. four times per day) and massage well into affected areas. One can also soak a piece of gauze with ECS and wrap it around feet and toes before retiring to bed. Spray in shoes and cross-trainers to eliminate foot odour. Take oral dose of 50 ml at least twice a day.

Here is a partial list of skin conditions which have been successfully treated with electro colloidal silver. (Please refer to our Testimonial page)

Abrasions	Candida	Herpes Lesions	Sebacious Cysts
Acne	Colds	Herpes Virus	Seborrhea
African Horse Disease	Cuts	Influenza	Shingles
Animals	Cystitis	Insect Bites	Sinus
Arthritis – Pets	Dermatitis	Insomnia	Sinus Headaches
Athlete's Foot	Diabetes	Leprosy	Skin Cancer
Athletic Performance	Diarrhoea	Moles	Skin Infection
Baby Rash	Ear Infection	Mumps	Skin Rash
Bed Sores	Eczema	Nail Fungus	Skin Ulcers
Blood Poisoning	Emphysema	Nappy Rash	Tension
Boils	Eye Infection	Pneumonia	Urinary Tract Infection
Broken Bones	Fever Blisters	Psoriasis	Warts
Bronchitis	Foot Odour	Ringworm	Wound Healing
Burns	Gum Disease	Rosacea	

**WOMEN & MOTHERS WITH SMALL CHILDREN**

Electro Colloidal Silver does not sting like many other antiseptic or antibacterial agents - and is completely harmless when applied to the most sensitive areas of the skin or to exposed skin tissue. It is thus completely safe for women, infants and small children.

For mothers with babies and small children, watch how quickly diaper rash, eye infections and ear infections clear up with ECS. You can apply it with an eye dropper for any type of eye infection. Pink Eye for example, clears up within a matter of hours or overnight when applied before going to bed. Ear infections quickly heal after spraying or putting a few drops in the ear, saturating a small piece of cotton wool for an earplug and then periodically re-spraying. By spraying on at every nappy change, nappy rash (or any baby rash) clears up rapidly.

When taken orally and added to douches, women will find it rapidly clears up vaginal/yeast infections, vaginal thrush and most cases of cystitis. It has also been reported to lessen the symptoms of premenstrual tension.

It is safe for pregnant and nursing women and even aids the developing foetus in growth and health, as well as easing the mother's delivery and recovery.

**Feminine Hygiene:**

Body odour is merely caused by bacteria and ECS neutralizes bacteria within seconds! It is highly effective, non-stinging and completely safe as an underarm deodorant, vaginal deodorant or on the most sensitive body parts.

**Candida Yeast Infection:**

Almost all disease and health problems are greatly aggravated by candida. This yeast infection will readily grow in any moist area of the body, such as the mouth ("thrush"), groin ("jock itch"), vagina ("thrush/yeast infection") and intestines. Candida often gets out of control following the use of antibiotics. Diabetics are also especially prone to this type of problem. Electro Colloidal Silver is an outstanding treatment for candida.

*(Click here for a full report on Candida yeast infection )*

**Lupus, MS & Other Auto Immune Diseases:**

Electro Colloidal Silver has a remarkable way of strengthening the immune system - and outstanding results on these ailments have been reported following prolonged use of electro colloidal silver in larger doses of 200ml - 300ml per day.

**Sinus Problems:**

By positioning your head backwards off the edge of a bed, put a few drops in each nostril and let it rinse the sinuses thoroughly!

For several decades, silver has proved itself in the treatment of burns and eye, ear, nose, throat, vaginal, rectal and urinary tract infections.

It has been prescribed as an adjunct treatment for reproductive disorders in women and the circulatory system, as well as treatment for AIDS infective complications. It has even been used as a treatment for thyroid conditions, infantile diseases, parasites, wounds of the cornea, enlarged prostate, infections of the eustachian tubes, sleepwalking and anorexia nervosa.

**Ladies, rejuvenate your skin!**

When sprayed on before and after make-up, ECS is a marvellous skin conditioner and many women have reported a remarkable improvement in their skin tone and complexions! Good ECS has an alkaline pH in the range of 8.0 - 9.5.

## THE HERXHEIMER EFFECT

Sometimes, when a person starts off for the first time ingesting a large amount of ECS, the silver ions are extremely efficient at cleansing the body of pathogens.

If your body is extremely ill or toxic, do not be in a hurry to clear up everything at once. If pathogens are killed off too quickly, the body's five eliminatory channels i.e. the liver, kidneys, skin, lungs and bowel, may be temporarily overloaded, causing a brief "healing crisis" with flu-like conditions, minor skin rashes, headache, fatigue, dizziness, nausea or aching muscles. All of these conditions should subside quickly.

This is called the "Herxheimer effect" - also referred to as the 'Wellness Syndrome'. It is named after Dr. Karl Herxheimer, who first identified the phenomenon. It is the result of tens of billions of pathogens dying off in the body, and releasing toxins as they die. The die-off is so rapid, and so large, the body is unable to effectively process the toxins quickly enough to prevent the above-described symptoms.

One may also experience diarrhoea, as the body tries to flush itself out. In that case, one merely needs to reduce or temporarily stop the ECS until the healing crisis is over, and then start taking smaller amounts of ECS and build up again gradually.

NB! The process can be assisted by drinking large amounts of pure clean water every day to help the body eliminate the billions of dead toxins.

Regular bowel movements are a must in order to relieve the discomforts of detoxification. Resolve to eliminate refined carbohydrates (white refined sugar, white refined flour products etc) and saturated fats from your diet. Try and exercise more. Given the opportunity, the body's natural ability to heal will amaze you!

**\* Important Note:** The Herxheimer effect is not a toxic response to silver. In actuality, a Herxheimer effect will often trigger a toxic response, but not to the silver itself, rather, to infections being rapidly eliminated within the body. The difference is important, especially if a seeker is attempting to treat a chronic condition.

## PETS, ANIMALS & BIRDS

### **Dogs and Cats:**

In the presence of Electro Colloidal Silver, ulcerative and infective skin conditions due to flea infestation, mange, eczema, skin sores or abrasions are quickly cleared up. Spray ECS onto the affected area and rub it into the skin and fur regularly until the condition clears.

Administered orally with a syringe, Electro Colloidal Silver has been proven effective against canine parvo virus, feline leukemia and ringworm. Cats with abscesses may be treated both internally and externally.

Pet lovers need to add a capful to their pet's drinking water. Add a cupful to birdbaths and the dog's bath. You can also spray their bedding and let it dry. It has been observed that many animals gain weight and energy following a course of Electro Colloidal Silver suggesting that their general well-being is enhanced.

### **Birds and Poultry:**

ECS is excellent as a preventive and cure for Canker, Pox, Paramyxovirus, Salmonellosis, Newcastle's disease and other bird and poultry diseases. Administer orally with a small syringe into the crop or spray directly onto affected area. Add electro colloidal silver to the birds' drinking water as often as possible to promote excellent general health and vitality. (Refer Testimonial on Racing Pigeons)

### **Horses:**

Electro Colloidal Silver has been successfully used on a wide range of infectious conditions pertaining to horses - including strangles and thrush. Spray on regularly for all types of skin infections - as well as cuts, scrapes, insect bites, sores and wounds. Large wounds, abscesses or other skin irritations can be washed or sprayed with ECS (use a glass spray bottle for ease of application).

Symptoms such as coughs and colds, hoof abscesses and eye infections respond best by high dosage oral administration with a syringe for 5 days.

For 'Seedy Toe' of the foot, soak cotton wool in ECS then clear the debris from the affected part of the hoof as much as possible. Pack the hole with the soaked cotton wool daily until the area granulates with healthy horn tissue.

Also good for over-reach injury in horses and for greasy heel infections - allow the area to be soaked in ECS for 6 minutes and repeat often until the condition clears.

Add a cupful to the horse's daily drinking water as a preventive against all types of infections and disease. (Refer Testimonial on African Horse Disease.)

### **Cattle:**

ECS has been successfully used for treating mastitis, anthrax, hoof rot, foot & mouth disease etc. Electro Colloidal Silver has shown dramatic results in the case of very young animals such as foals and calves scouring. Given orally with a syringe twice daily it has the most beneficial effect.

### **Important general notes on use for animals:**

Animals generally tend to respond very quickly to electro colloidal silver. As the disease producing organisms are destroyed they need to be eliminated from the body through normal channels. It is important therefore to make sure the animal you are treating has access to plenty of clean water at all times and is encouraged to drink as much as possible. Some animals will drink water to which Electro Colloidal Silver has been added seemingly knowing it to be beneficial.

### **Plants**

Add half a cup to a few litres of water and use as a plant spray to stop fungi, moulds, rot, and most plant diseases.

Excellent results have been reported when spraying for blight on fruit trees, leaf fungus, powdery mildew etc.

Treating the soil around young plant roots make them grow more vigorously and healthier.

Cut flowers can last up to two weeks longer when a capful is added to their water!
